Summary

Data Science graduate with practical experience in analytics, machine learning and data engineering.

Since graduating, I have continued to develop production-oriented technical skills through independent projects and structured professional training. I enjoy solving technically challenging problems, learning quickly and building data products that **deliver value**.

Projects

Behavioural Profiling & Classification from Game Telemetry

- Parsed 400GB+ of binary data from Counter-Strike 2 matches into engineered features, aggregating them into a **published dataset** with over 300 community downloads across [kaggle](#) and [huggingface](#).
- Performed domain-informed statistical analysis and evaluated classification performance to demonstrate **potential for commercial application**.

Analytics Platform [WIP]

Event-driven file-processing pipeline on **GCP** (GCS → Pub/Sub → Cloud Run) connected to a deployed frontend. Users upload game recordings; the system parses them into structured match stats. **MVP live** end-to-end.

Training Programme Projects

The data training I completed consisted of a series of small scale learning projects. Some examples of these are: A **deployed LLM-integrated Streamlit app**, BI dashboards using real data in Tableau/Power BI, a relational database in PostgreSQL, and a local ETL pipeline to produce an analytical dataset.

Education

University of Exeter (2022-2025)

Data Science BSc (Hons) - Grade 2:1

Rockborne Data Training Programme (2026)

Completed an intensive, instructor-led data training programme focused on common industry tools.

365 Data Science (Online)

Data Scientist Career Track

Previous Jobs

Cocktail Bartender (2021-2026)

The Ivy Asia | Turtle Bay | TGI Fridays

Worked across four years in high-volume and premium venues, developing strong communication skills.

Skills & Technologies

Languages: Python, SQL, R | **Libraries:** Pandas, PyTorch, Scikit-Learn, Polars, Seaborn | **Tools & Cloud:** Google Cloud Platform, Docker, Cursor, GitHub, Streamlit, Tableau, Power BI, Excel, | **Concepts:** Machine Learning, OOP, Hypothesis Testing, Responsible Agent Coding
