Summary

Since obtaining a degree in Data Science, I have continued to develop production-oriented technical skills through independent projects and structured professional training.

I learn quick and enjoy building data products that **deliver value**.

This version of my CV is for my website.

Projects

Behavioural Profiling & Classification from Game Telemetry

- Parsed 400GB+ of binary data from Counter-Strike matches into engineered features, aggregating them into a **published dataset** with over 300 community downloads across [kaggle](#) and [huggingface](#).
- Performed domain-informed statistical **analysis** and evaluated classification performance to demonstrate **potential for commercial application**.

Cloud Analytics Pipeline

End-to-end event-driven **data pipeline on GCP** (Cloud Storage, Pub/Sub, Cloud Run) for Counter-Strike match analytics: users upload large binary files, the system parses them into structured JSON, and a **deployed frontend** serves interactive results. Live MVP.

Industry Training Projects

- Built a UK crime data **Snowflake ELT** (Python load → dbt bronze/silver/gold, Terraform-provisioned) feeding a self-serve **Power BI** dashboard showing KPIs trends and a choropleth framed for a non-technical audience.
- Also: **Tableau** dashboard on real Airbnb data, **PostgreSQL** modelling, and a small LLM-integrated **Streamlit** app for providing holiday inspiration.

Education

University of Exeter (2022-2025)

Data Science BSc (Hons) - Grade 2:1

Rockborne Data Training Programme (2026)

Intensive instructor-led programme covering SQL, Excel, Tableau, Power BI, Python and data modelling.

365 Data Science (Online)

[Data Scientist Career Track](#)

Previous Jobs

Cocktail Bartender (2021-2026)

The Ivy Asia | Turtle Bay | TGI Fridays

Four years in high-volume and premium venues, developing communication skills.

Skills & Technologies

Languages: Python, SQL, R | **Cloud & Infra:** GCP, Snowflake, Docker, Terraform, GitHub Actions | **Data & Transform:** dbt, Pandas, Polars, PostgreSQL | **Analytics & BI:** Tableau, Power BI, Excel, Streamlit | **ML:** Scikit-Learn, PyTorch, Feature Engineering
