Summary

Data Science BSc graduate very eager to learn!

Seeking a graduate role in data science, engineering or analytics. Self-directed personal project work currently includes dataset creation, feature engineering, statistical analysis, and predictive modelling. Always building projects or upskilling.

This version of my CV was made for my website.

Education & Certificates

University of Exeter (2022-2025)

Data Science BSc (Hons) - Grade 2:1

[What my course involved \(link\)](#)

365 Data Science (Online Courses)

Data Scientist Career Track Certificate

<https://learn.365datascience.com/c/7e8849057f/>

Projects

Behavioural Profiling & Classification from Esports Telemetry

Developed a bespoke, local ETL pipeline to synthesise match telemetry. Then used the data for analysis and classification of behavioural archetypes at the professional level of the game "Counter-Strike".

- Used python to parse 400GB+ of match replay files and engineer features, aggregating them into a [published dataset](#) with over 150 downloads across [kaggle](#) and [huggingface](#).
- Domain-informed analysis of the data using statistical, visual and machine learning methods.
- Evaluated classification performance with various models to predict player "roles".

See my website for a [more detailed write-up](#).

Skills

Data Science Programming & Statistics

Python, R, SQL, OOP, Machine Learning, Neural Networks, Data Visualisation, PyTorch, Scikit-Learn, Pandas, Model Evaluation, Hypothesis Testing, Confidence Intervals, Bayesian Statistics, Regression Analysis

Previous Jobs

Cocktail Bartender

I have worked as a cocktail bartender in various restaurants for ~4 years. This has refined my soft-skills and exposed me to various fast-paced "client"-oriented workplace environments.
